## Problem 1

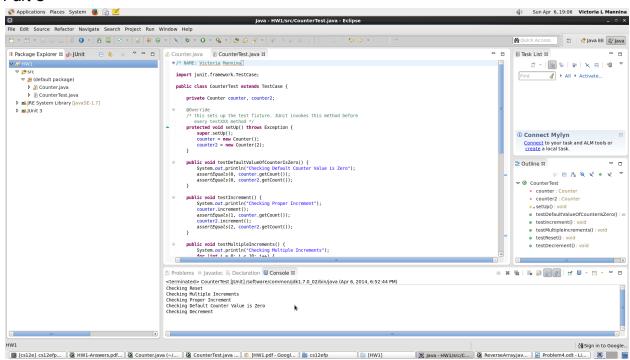

## Part A

- 1. javadoc -author -version -d ./doc Counter.java
- 2. -author -version

## Part B

- 1. a) yes, properly runs the code
  - b) no, does not work because it couldn't find it
  - c) yes, properly runs the code
  - d) no, does not work again because it couldn't find it
- 2. java junit.swingui.TestRunner CounterTest
- 3. set CLASSPATH = classpath1;

## Part C

To specify the classpath to find the junit.jar file, right click on HW1, go to properties, go to Java Build Path, then select Add Library. Select JUnit and add Library JUnit 3
